LG 55LW6500 LED HDTV

The LG 55LW6500 is the second in a new series of 3-D enabled flat-panel televisions offered by LG. This television is sold with 4 attractive, light-weight, simple to utilise 3-D glasses, and this model in the LG LW6500 series is the only models offered with the glasses within the box. LG has included Cinema 3D technologies in this [LG 3D TV](#) model, and the 55 in. display offers television spectators of beautiful view of all television shows. This device is sold with a "magic wand-like" infrared RC device , a matching base, and the television is wall mountable. To see what else comes included with this particular flat panel offering it's required to look at the set's design and product specs.

The LG Infinia 55LW6500 has a frame that is less than 1 inch thick. It has a black outer housing with a silver ornamentation round the edge. The body of this tV set is rectangular in shape, and the corners are softly curved. The back panel on this flat-panel tV sports all the connectivity options in color-coded format. Some controls for operating device are on the front of the TV, but the tV will be essentially operated with a radio control. The base that comes included with this tV is also black and has a short, clear, cube formed neck. Clearly, one will find this tV offering highly engaging the moment they behold it.

The LG Infinia 55LW6500 has a backlit LED display, Smart TV access, an Internet browser, in-house apps, and augmented 3-D processing features. This tV sports a local resolution equaling up to 1920 by 1080 pixels. It has an excellent contrast proportion, a superb aspect ratio, and the tV is DLNA compliant. This set is crafted with a 240 Hz refresh rate, a 16 to 9 aspect proportion, and it's 3-D prepared.

The LG 55LW6500 is formed with energy saving modes for the environmentally conscious or for those consumers looking to reduce the cost of their power bill. This set is also fitted out with LED flat-panel display technologies, local dimming, passive 3-D features, NetCast access, and it's got a wireless AV Link. This television is Wi-Fi enabled, and it has earned flicker free validation. The best feature found on this actual television is the film type patterned retarder display panel sporting nanotechnologies included for the needs of uniformly distributing LED lighting.

The LG Infinia 55LW6500 is an all-around phenomenal flat-panel, 3-D enabled tV. Its design makes it a television set that may prove gorgeous in the home or in the office. This set has a extensive variety of connectivity options, and it can easily be made the hub of one's entertaining centre. With features like 3-D light boost, flicker free authorization, a fast refresh rate, smooth motion processing technologies, 2-D to 3-D conversion functions, expansive calibrations, a variety of white balance controls, and a perfect color temperature, this device is a best investment for the tV looking for shopper.
